To whom it may concern

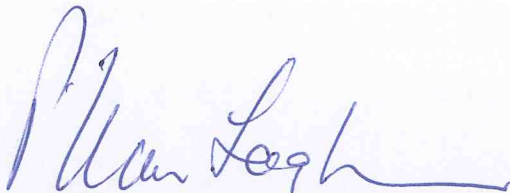

We currently have four of Towai Technologies Ltd Mini Fuel Additive Applicators with two installed on Mitsubishi Shogun 430 trucks for Toll Group, one on a Western Star truck and one on a Tana Compactor for Envirowaste Ltd.

Our fuel additive, which has a dosing ratio of 4000:1, is one element of a total solution package we offer to our customers, providing them with reduced maintenance, lower fuel costs, improved performance and Fleet Data Management. The Towai Technologies Applicator is an important tool to help us sell our solution to the trucking fleets.

We are impressed with the design, operation and performance of the Applicators. There has obviously been a lot of thought and work gone into the design because it seems all the variables relating to fuel additives and the adverse trucking environment have been taken into account.

Towai Technologies have been very helpful and professional in working with us and we have no hesitation in recommending them and their Applicators.

Yours faithfully

Phil van Loghem
